

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at www.airpoint.net.

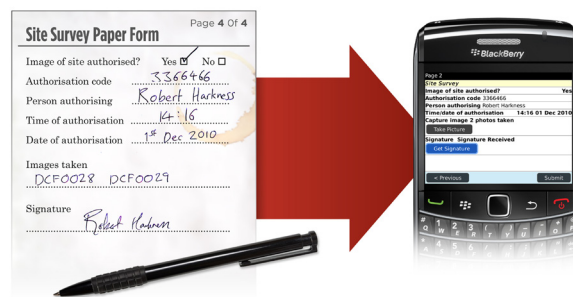

Intelligent Forms

Airpoint's paperless forms solution for your mobile workforce

Overview

Our newest mobile application is an intelligent forms solution, empowering and optimising your business' most valuable resource; its workforce. Intelligent Forms is a complete end-to-end paperless forms solution, providing you with a highly professional and efficient data capture service.

Intelligent Forms; making paper forms redundant

Using BlackBerry® devices and a browser based management application, Intelligent Forms enables your workforce to arrange and manage appointments, design and maintain forms, and provides a dynamic data capture solution. Data collection is via the BlackBerry® device direct to your back-office database. Surveys,

fact finds, questionnaires, in fact any type of data collection using paper forms are made redundant with Intelligent Forms. Additional functionality includes image and signature capture, whilst GPS tracking provides enhanced security for your staff together with a robust monitoring tool.

Intelligent Forms is fully auditable and supported by the BlackBerry® secure data channel.

Features & Key Benefits

- Flexible and intuitive software enables you to design, amend and maintain your own bespoke forms.
- Manage appointments both centrally and from the BlackBerry® device (with updates to Microsoft Outlook®), improving workforce effectiveness and output.
- Removes the need for paper data recording, thereby streamlining administration, reducing errors and duplication.
- Fully integrated image and signature capture ensures that both are automatically allocated to the correct form.
- Tracking facility allowing immediate pinpoint of current user location in addition to previous activity log. Extended tracking functionality also available.
- Comprehensive user experience including customer address look-up, satellite navigation, and automated alerts if delayed.
- Fully auditable and secure application affording greater confidence in data protection.
