

Defect Management

Overview

Developed with construction and engineering professionals, Airpoint's Defect Management solution enables companies to fully mobilise their snagging process.

Inspections and defect reporting can now be achieved exclusively using wireless devices - leading to substantial cost, efficiency savings.

Features

- Real-time transmission of inspection results to central database for immediate analysis
- Configurable setup options allow for maximum flexibility and user experience
- Sub-contractors/Site Managers immediately notified of any issues via automatic email/SMS text message
- Back end application provides real-time overview for authorised users
- Simple and easy-to-use interface

Key Benefits

- Time taken to perform snagging process significantly reduced
- Process now truly paperless
- Tangible cost and efficiency savings
