

Activity Management

Overview

Activity Management is part of **Airpoint's Mobile Policing Suite (MPS)** of applications which has been designed and developed by working closely with forces throughout the UK.

Under current circumstances, an officer may be assigned to abstractions as well as to daily activities. Activity Management simplifies the process for the duty officer so that all necessary activities are scheduled, and then actuals recorded by the assigned officer remotely, without the need for visiting the station.

Features

- Integrates into Activity Costing System (eForms)
- Mobile recording of Activities and Abstractions
- Report on results immediately and remotely

Key Benefits

- Ability to view overall activities and abstractions across the entire local force to ensure coverage
- Increased information to assist with deployment planning for officers
- Less time spent returning to the station to report on results, and more time spent on citizen-centric engagement

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at www.airpoint.net.
