

# Crime Tasking

## Overview

The Crime Tasking solution is part of **Airpoint's Mobile Policing Suite (MPS)** of applications which has been designed and developed by working closely with forces throughout the UK.

Currently for most forces in the UK, an officer must go into the station to personally retrieve a list of tasks to complete during their shift. By talking to various forces throughout the country it was clear that being able to send this data wirelessly to an officer would bring significant benefits.

## Features

- Access to caseload and tasks allocated by supervising officer
- Officer can update tasks as they are completed
- Ability to see other officers caseloads
- Ability to enquire on any crime number
- All supporting information in the crime database is available
- Standard Actions checklist to ensure correct procedures are followed

## Key Benefits

- Reduced officer dependence on calling/visiting station to obtain vital information
- Reduced red tape – officer can file crime report on handheld
- Increased officer effectiveness - more time spent out in community fulfilling service commitments.

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at [www.airpoint.net](http://www.airpoint.net).
