

Encounters

Overview

Encounters is part of **Airpoint's Mobile Policing Suite (MPS)** of applications which has been designed and developed by working closely with forces throughout the UK.

In a normal situation, an officer may proactively approach a suspicious-looking person and many of the details are lost by the time their station visit occurs. This information may be vital to the next encounter with the same person by a different officer. What is required is mobile recording immediately the encounter is concluded to avoid this situation.

Features

- Comprehensive “federated search” of local and national systems
- Re-use of search result data in other mobile applications
- Secure management and deletion of all temporary search result data
- Stop and search recording
- Option to print
- Option to integrate images from local systems

Key Benefits

- Immediate availability of information to all officers
- Simple application that consolidates information from many sources
- Speeds the identification of persons or vehicles, which is the start of many policing processes

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at www.airpoint.net.
