

Management Console

Overview

The Management Console is part of **Airpoint's Mobile Policing Suite (MPS)** of applications which has been designed and developed by working closely with forces throughout the UK.

With a seemingly never ending increase in the number of systems being used by police forces today the role of the IT Administrator has never been so important. Making life easier for support staff is often overlooked by applications developers, if more systems could be consolidated then administration becomes easier and more efficient.

Airpoint's Management Console assists IT Administrators and staff by providing a single point of access to all MPS component applications, allowing control of all MPS software through one common interface.

Features

- Ease-to-use web interface
- Single point of access to logging files and configuration variables for all MPS applications
- Easily extendable to accommodate further MPS applications
- Maintenance of users and user groups synchronized with BES
- Records application usage
- Runs alongside Ordia Solutions' MTCS product

Key Benefits

- Reduced setup time for MPS configuration
- Single point of access allows issues to be identified quickly
- Visibility of which officers are using which applications
- Helps identify training needs where officers are not using applications appropriately

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at www.airpoint.net.
