

Mobilising Niche RMS

for frontline officers

Overview

If your force has invested in Niche RMS, you will appreciate the level of integration, flexibility and functionality it provides your officers. Your next step maybe mobilizing access to Niche RMS for front line officers, or replacing an existing mobile solution. If so, Airpoint have developed a BlackBerry based solution that enables many of Niche's

features to be accessed remotely. By providing your officers with access to person, vehicle, address and occurrence data whilst on patrol, you are enabling them to identify suspects in the street and make an early arrest. Or, by allowing them to complete reports and intelligence logs whilst on the road rather than back at base, officers remain visible to the community they police for longer each day.

Airpoint's Mobile Policing Suite 2 ("MPS2") enables these benefits by developing a workflow-based solution that follows the processes your officers use. For example, having stopped a suspect in the street the officer asks him/herself 3 key questions: who are you?; are you dangerous?; and, can I arrest you? MPS2, answers these questions after the initial search with a crisp, clear screen containing an image, a description and warning flags with associated handset vibration if the suspect is dangerous. The officer is immediately aware of a potential risk, and is able to assess their next actions accordingly.

Features

- Identify people, vehicles and property in the field
- Access all supporting information available in Niche RMS
- Access to caseload and tasks allocated by supervising officer
- Standard Actions checklist to ensure correct procedures are followed
- Submit intelligence reports and update tasks as they are completed
- Enquire on any Occurrence and associated people, vehicles, and addresses

Key Benefits

- Enhanced officer safety in the field
- Reduced officer dependence on visiting the station to obtain vital information
- Increased officer effectiveness as more time spent fulfilling service commitments
- Improved officer visibility on the ground and in the community
- Increased officer productivity

Airpoint specialises in developing tailored mobile solutions that deliver maximum efficiency for distributed workforces. For more information, please visit us at www.airpoint.net.
